WISE ENERGY for VIRGINIA

We, the undersigned, are opposed to the Old Dominion Electric Cooperative's proposal to build a 1500MW coal fired power plant in Surry County, a Hampton Roads Community. This plant will threaten the health and wellbeing of our fellow citizens by annually emitting 118 pounds of mercury near the sensitive Chesapeake Bay ecosystem and over 14 million tons of carbon dioxide -- the equivalent of nearly 3 million cars on the road each year. These emissions will result in increased smog pollution and higher levels of mercury, which is known to impair the development of children. This is the wrong direction for Surry County and for Virginia.

Sincerely, The Undersigned
